

Your Challenge:

All cars that burn fossil fuels should be banned and electric cars should replace them. Do you agree or disagree?

Introduction

Paraphrase:

Debating the idea that the fossil fuelled cars should be completely replaced by electric cars.

State opinion and main reasons:

Agree. Burned fossil fuels are harmful to the environment, and much harder to maintain than electric cars.

MBP 1

Topic sentence: Burned fossil fuels are harmful to the environment

Explain: The fossil fuelled cars emit carbon dioxide and other pollutions to the environment

Explain: On the other hand, the electric cars have zero emission to the environment, which is necessary for reducing global warming

Example: A lot of urban areas like Sao Paulo, Brazil are suffering from severe air pollution caused by vehicular emissions.

MBP 2

Topic sentence: electric cars are easier to maintain

Explain: There are no fluids such as oil and water, and less particles that require maintenance

Explain: This results in a more smooth and convenient usage, and faster, more convenient experience

Example: electric cars are highly adopted by countries such as US and Japan

Conclusion

Reiterate opinion and summarise:

Agree because EV have a reduced environmental impact and are easier to maintain and to use.

How to submit your task:

1. Complete your task in this document and email it to my team at chris@ieltsadvantage.com with "5 Day Challenge Day One" in the subject line.
2. My team will send you the feedback lesson that you'll need to identify your weaknesses and learn how to correct them. Make sure to watch it carefully and compare your answers honestly!
3. When you're ready, you should move on to the next lesson, complete that task and email it to my team with "5 Day Challenge Day Two" in the subject line. After just five days of repeating those steps, you will have successfully completed the challenge and improved your Task 2 essay skills!
